

## In-person Workshop

# Harvesting Small Forest Blocks

**Be able to confidently understand the harvesting process as a small forest owner, what's required of you and the questions you should be asking along the way.**

This workshop is designed to help you, as a forest owner, get a better understanding of harvesting your forestry block; including managing environmental impacts and selecting contractors.

This workshop will be delivered to groups of small scale forest owners and farmers with forest blocks in the Auckland/Northland regions. This includes forest owners who are not forestry professionals, those who own a forest that isn't managed by a forestry company or those who have responsibility for harvesting plantation forestry but don't know where to start.

**Designed and led by Perrin Ag on behalf of Auckland Council (Healthy Waters), with input from industry experts.**

### What's in it for you?

- Understand why getting harvesting right is important.
- Learn the questions to ask to confidently select the right harvesting contractor for you.
- Start thinking ahead and planning for your harvesting in the next 5 years.
- Tap into the knowledge and expertise of a forestry expert and get your harvesting questions answered.
- Better understand the harvesting process.
- Know who to go to for support when needed.

### Location and Date

Warkworth Town Hall, Mezzanine Room  
17 October 2023 - 9:30 am to 2:00 pm.

### Costs

Costs are covered by the Healthy Waters Wai Ora Partnerships team at Auckland Council. Morning tea and lunch provided.
