

Landowners and Contractors Assoc.....Chairman's Report 25th January 2024

As we commence our activities for the New Year we can reflect on the previous attempts and achievements.

Auckland Council continue to be our primary source of involvement, often frustration however we are worthy "watch dogs!

This year we will pursue AT with roading needs and priorities with the support of our 2 RLB members Colin and Tim who meet here with us.

We are working with several other local groups to further this cause

We will continue our investigation into the Tomarata/Te Arai Aquafir and the handling of such

Farm Environmental Inspections are of huge concern to many and we will continue to advocate for some transparency in AC's handling of them along with the fees which seem out of the realms of reality

We will meet with our local MP's to gain traction over many impending issues

I would suggest we plan our year out with visiting speakers and elected representatives.

Brian Mason

Chairman
