

LCA Chairman's Report 30th May 2024

This month has seen activity in several directions. The highlight being our MP's meeting of which only one MP attended as a result of differing circumstances.

Grant McCallum our Northland National MP gave us an interesting and informative address, providing an element of hope and positivity along the lines of Farm Compliance and Resource Management however was less than familiar with local Te Arai water takes of which he has referred to Chris Penk .

On May 3rd I attended the RAP meeting along with Tim and Colin, we will look to Tim for a summary of that. As is often the case the most topical issues to rural Rodney were side stepped, Water consents, roading , drainage and proposed boundary changes.

LCA continues to be active in promoting boundary changes within the Rodney Subdivision, this has been pushed hard by both NAG and RCV to the point an acceptable option has been passed by the RLB and is being referred on to the GB, we will hear more of this later in our meeting

Rick has uploaded matters of interest onto our website and we would encourage your input into using that communication

Tim Holdgate has intimated to be relieved of LCA Treasurer's role due to his other present and impending duties, a matter to be discussed later in this meeting

Work is still planned on the Water subject and that sub committee will meet again shortly

Brian Mason

Chairman
